Why we chose Adventure Escape SA

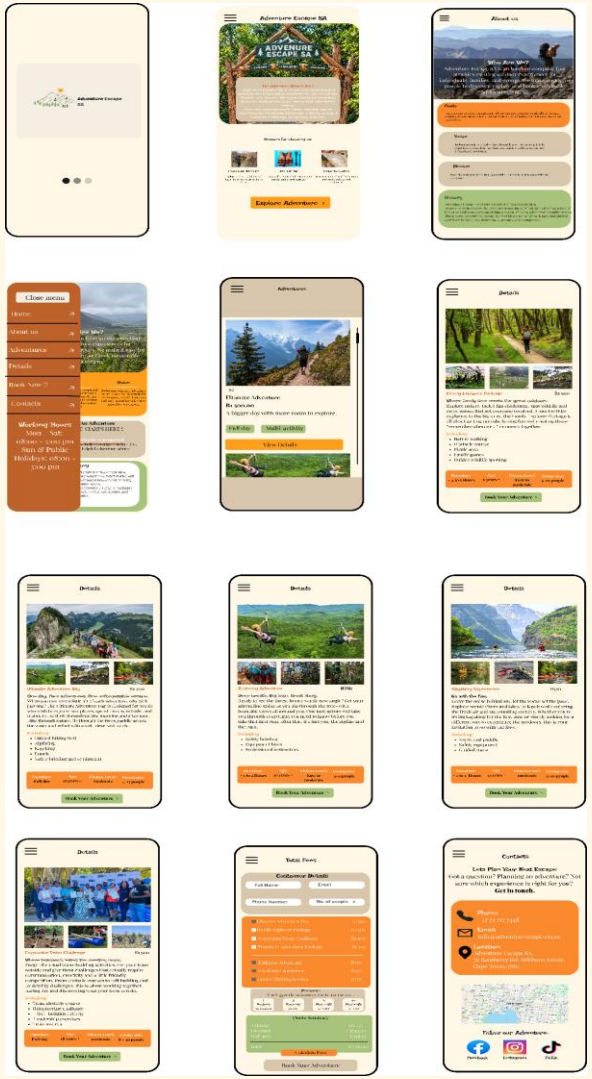

We chose Adventure Escape SA because it allows us to be creative while meeting all the project requirements. We also felt it was an interesting and realistic business idea that gives us a clear purpose for developing both a website and a app. We also chose it because it include clear functionality like viewing individual activities, calculating fees and contacting the company.

Adventure Escape SA
(established 2024, operates throughout Western Cape)
An SME initiative by Liam Daniels

Liam realised that many people or groups struggle to find one place where they can compare and book exciting outdoor activities. So with his passion for outdoor adventure and eco-tourism.

Liam requested that we develop a website and mobile app to promote their business, receive booking requests from potential customers, and also provide quotations for adventure experiences and activities.

Laim stated that customers can select more than one booking from the range of individual activities and packages and the more they booked the greater the discount.

Mobile Application

We chose a simple yet user-friendly design for the Adventure Escape SA application.

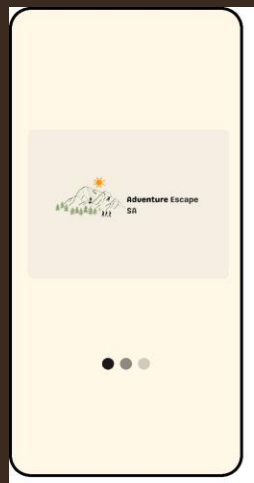

In order to make the app feel friendly to users, we decided to include a splash screen.

The home screen opens right after the splash screen which then shows the app to the users, it includes a button that leads to the adventure screen, where you can see all packages and activities.

A menu button in the top left corner helps you easily find Home, About Us, Adventures, Details, Total Fees, Contacts and Working hours

Thabang Raboroko provided the app's data and graphics, while Luyanda created the wireframe.

Design and why the designs were chosen

Design Overview

Layout & Navigation: The app uses a simple design which fits phone screens easily, there is menu button at the top left to keep things neat, cards for the different adventures, a bottom button that stays on the screen so you can book quickly, and extra screens for package details and maps

Colors & Pictures: We used earthy, outdoor colors like green and beige, mixed with bright orange for the important buttons. Real nature photos are put at the top of the cards to make it feel fun and adventurous.

Forms & Booking: Booking and filling out forms is easy with clean text boxes, number counters for how many people are going, and simple selection buttons.

Why we chose this designs

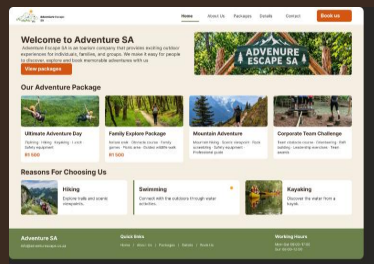

Easy to Use on Phones: Putting the "Book Your Adventure" button at the bottom means users can easily tap it with their thumb while holding their phone with one hand.

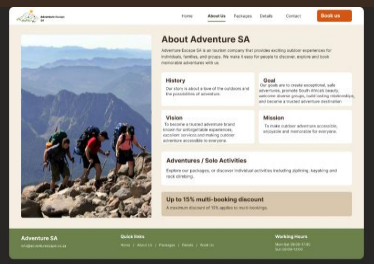

Not Overwhelming: Breaking all the info “like safety rules, what's included, and prices” into separate screens stops the phone screen from looking too crowded and confusing.

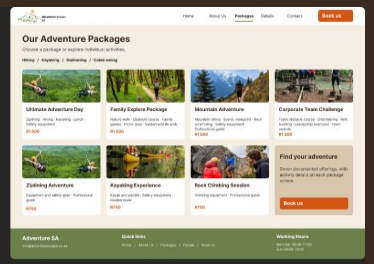

Matches the Outdoor Vibe: The green and orange colors make people think of nature, forests, and safety gear, which fits right in with what an outdoor adventure company should look like.

Website

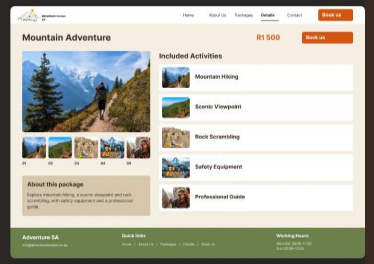

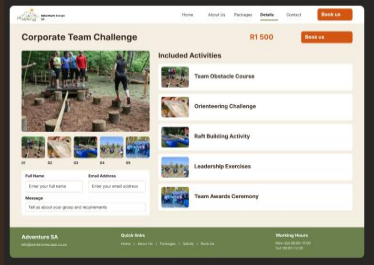

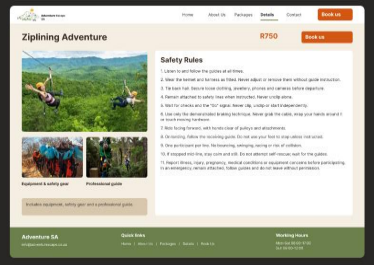

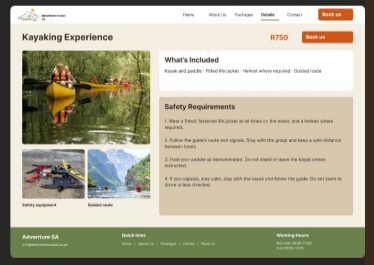

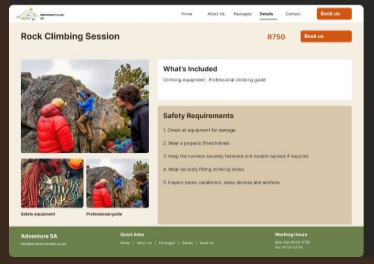

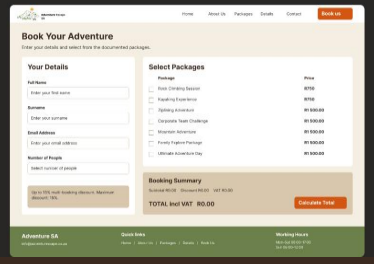

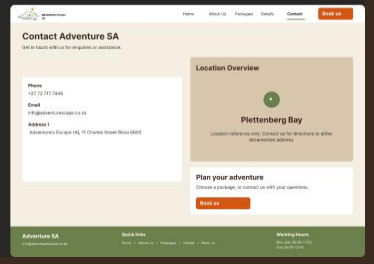

Additionally, we chose a clear and user-friendly website for Adventure Escape SA.

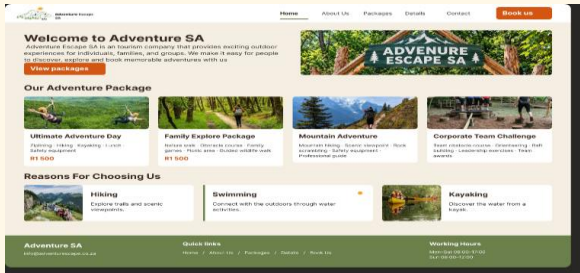

We designed the website to be clean and easy to browse using a clear top menu bar.

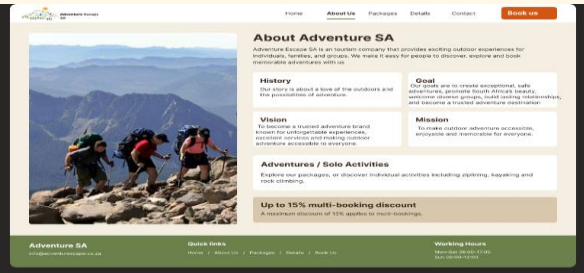

The home page introduces Adventure Escape SA with an overview of packages, activities, and reasons to choose us.

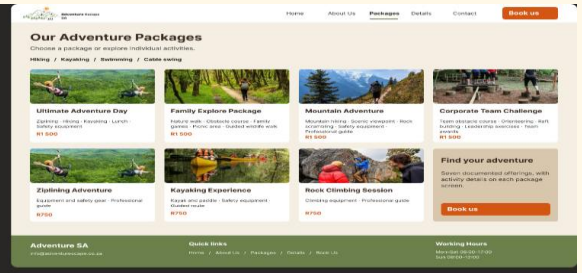

Other pages like About Us, Adventures, Package Details, and Contacts are easy to reach from the top menu, along with working hours and location details.

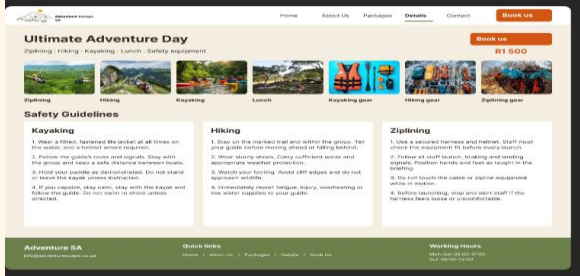

Thabang Raboroko provided the app's data and visuals, while Tshwarelo created the wireframe.

Design and why the designs were chosen

Design Overview

Layout & Navigation: The website has a header with clear links (Home, About Us, Adventures, Details, Book Us, Contacts) and a bright “Book Us” button on the top right

Content: Set up as a multi page site, grids are used to show adventure pakages and activities, a interactive map and a contact section.

Layout: Uses neat text, multi-column grids for packages and activities and separate boxes for what is included, prices and rules.

Why we chose this designs

Great for Computers: Big screens have enough space to show multiple cards in a row, making it easy to compare trips and prices without endless scrolling.

Builds Trust: Showing safety rules, maps, open hours, and clear prices upfront helps customers feel confident when booking.

Matches the App: Using the exact same colors (greens, beige, and oranges) keeps the brand connected so switching between a laptop and phone feels natural.

LOGO
(Why we choose this Logo:)

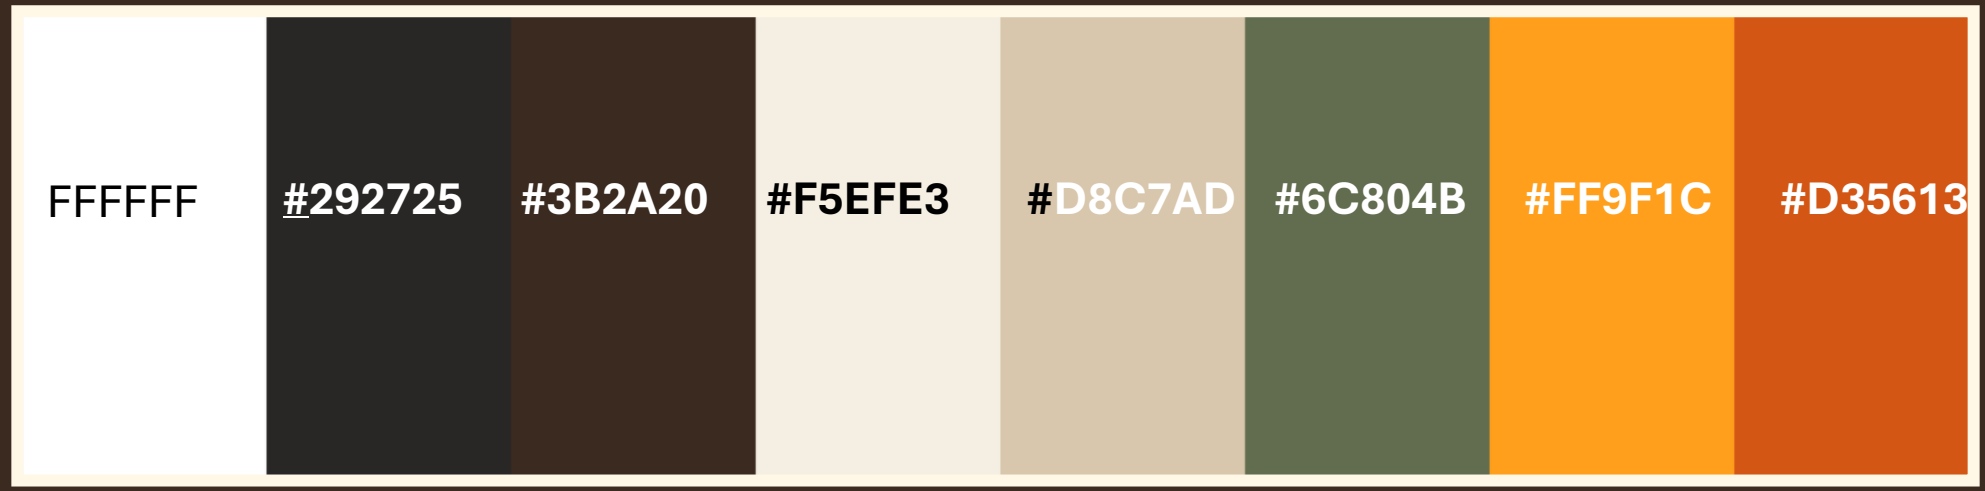

We chose this logo because it perfectly captures the spirit and identity of Adventure Escape SA as an Outdoor tourism business. The graphic elements, the mountains, trees, the sun and people enjoying outdoor activities , immediately tells customers what the brand is all about.

The Logo represents nature, exploration and excitement, additionally the earthy greens and warm orange tones align with the app and website design

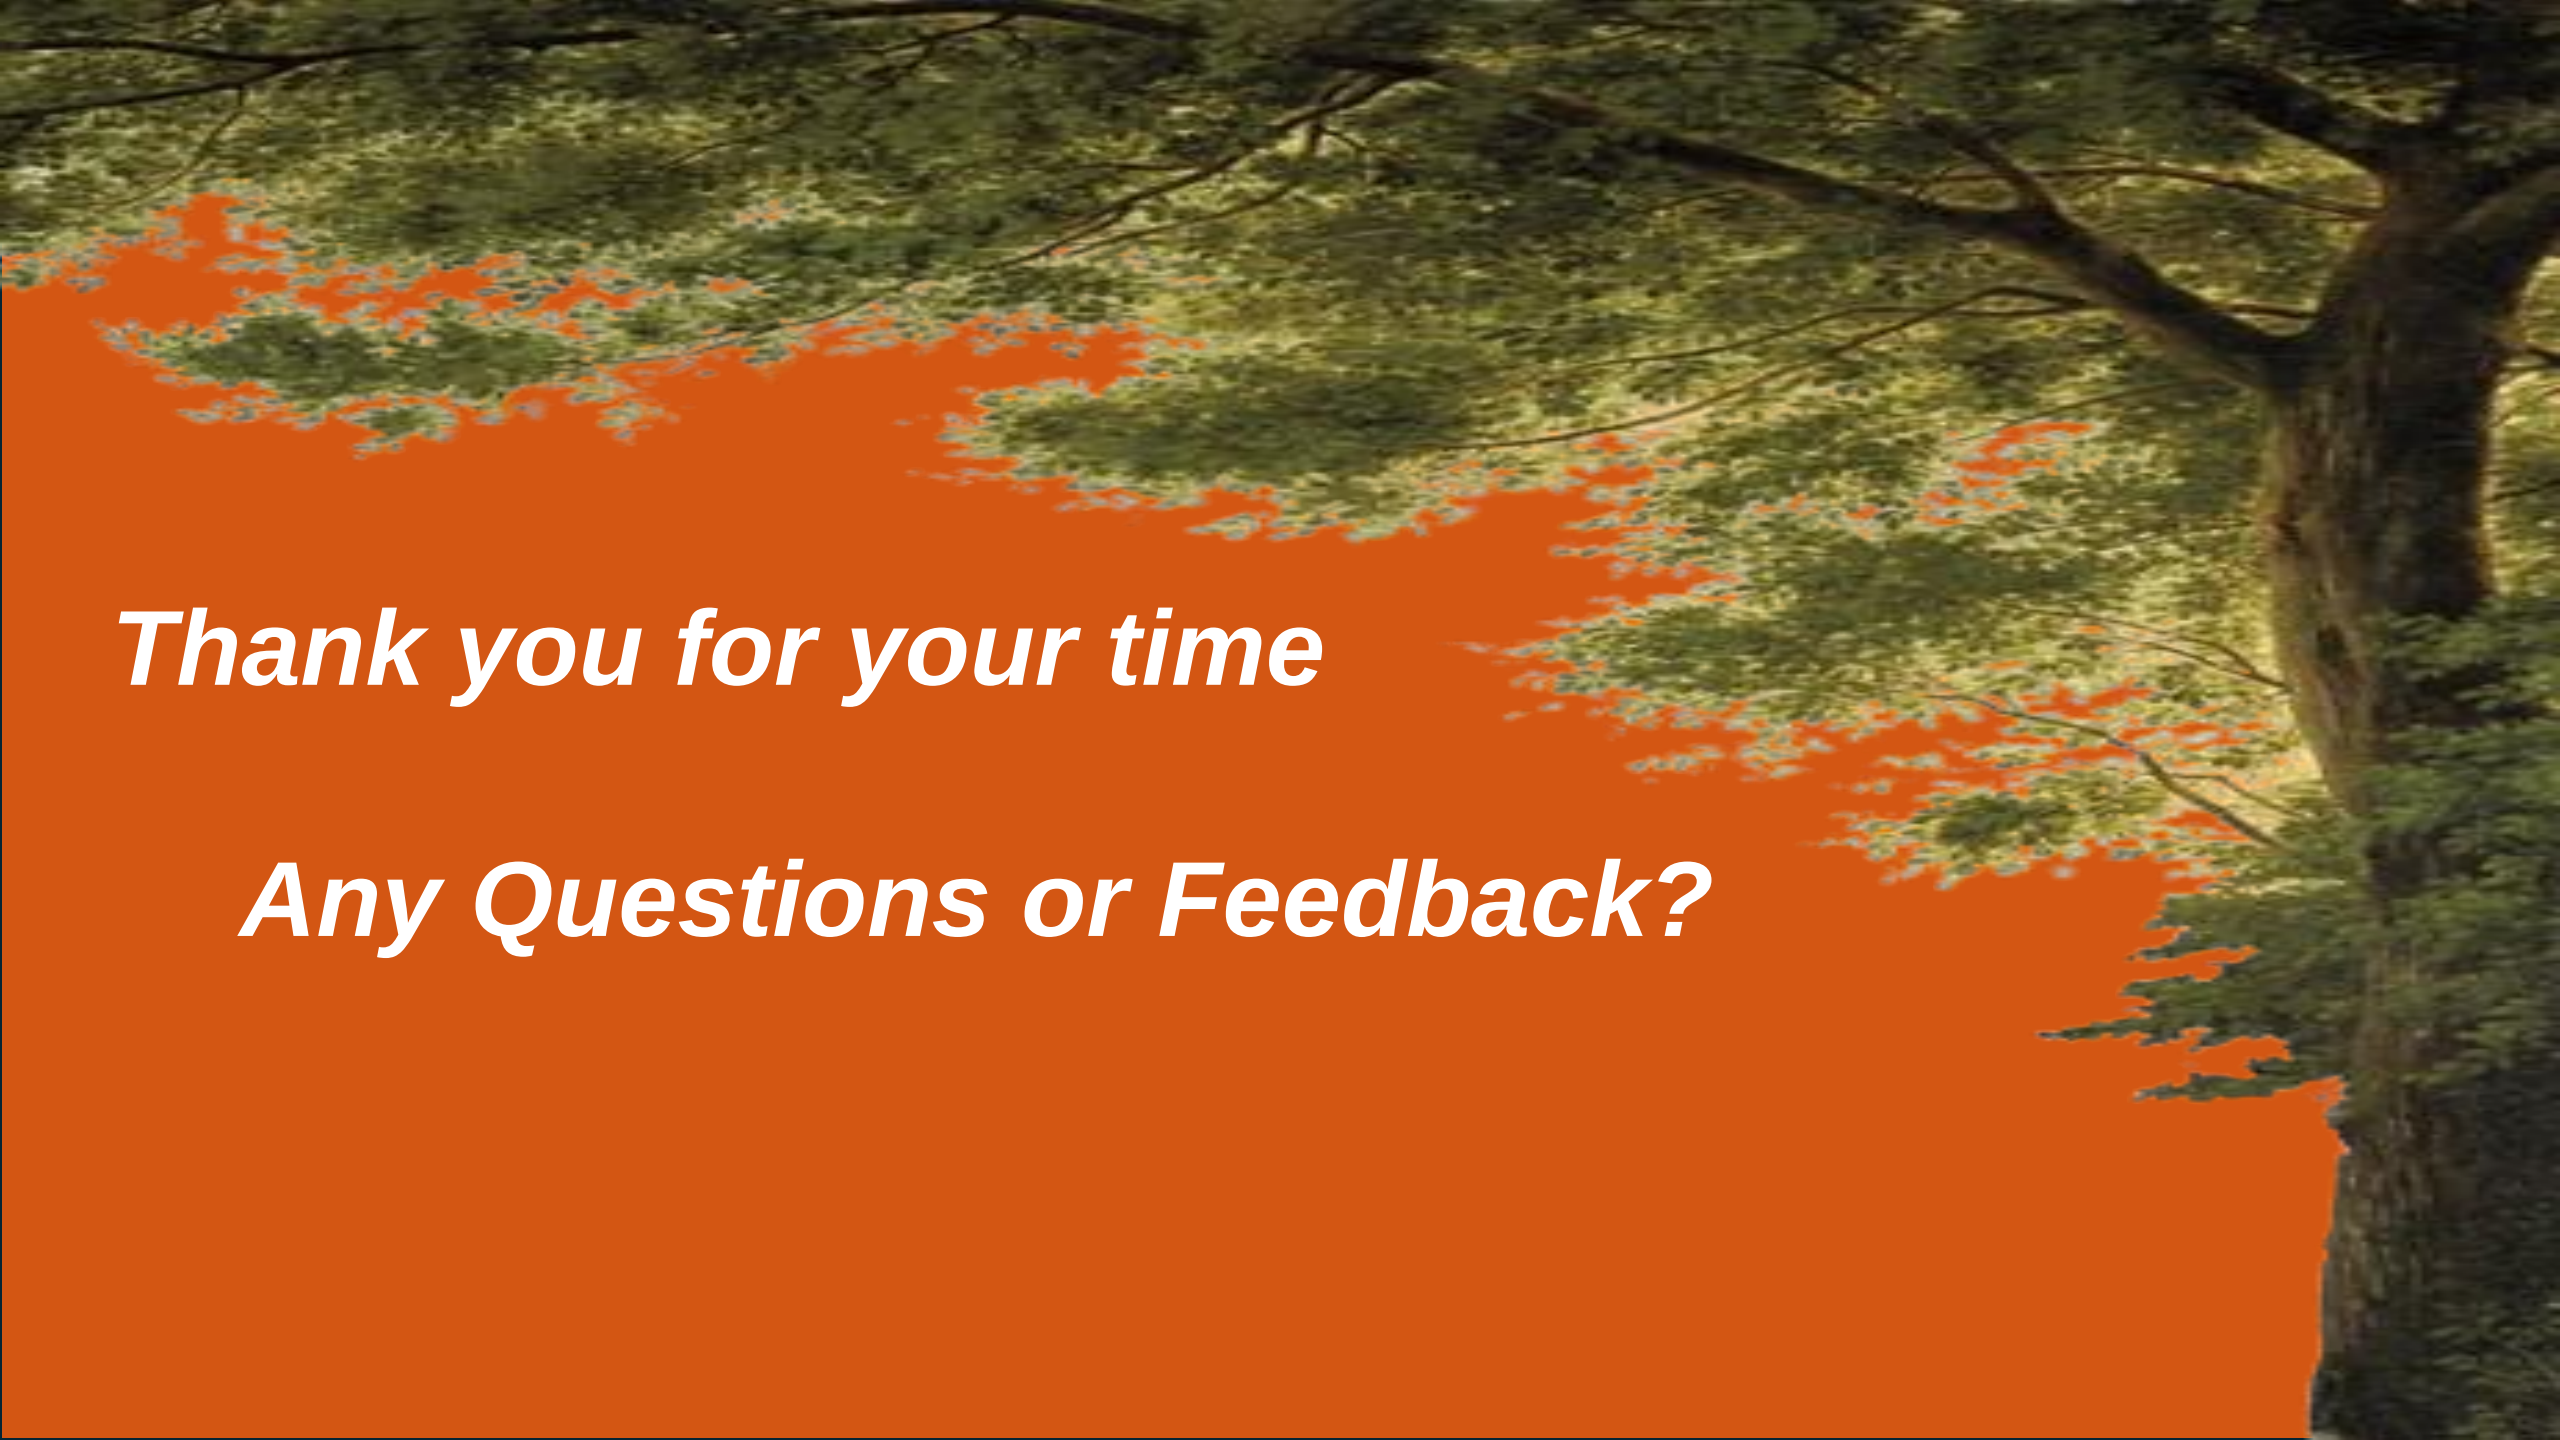

Colour Scheme
(Why we choose it)

We chose this colour scheme because we wanted it to represent Adventure Escape SA as an outdoor tourism business. The colours remind users of nature, adventure and exploring new places. They also make the app and website look welcoming, attractive and exciting. We wanted to use the same colours on both platforms so that our brand has a consistent look and is easy for users to recognise.
